## Contenance Product Changes – New SWEP Catalogue 2016

**Attention: Contenance / Urology Nurses Prescribers**  
**Re: Indwelling Urinary Catheters for Supra pubic use**  
**Prescribing supra pubic catheter on SWEP prescription**

Following a rigorous tender process in May 2016, SWEP's continence product catalogue was updated. As part of the change process a number of continence items previously available on contract are no longer available.

We wish to notify prescribers that there has been a change of indwelling urinary catheters available for supra pubic use.

The current product in the 2016 SWEP catalogue is:

- Supra plus Sayco, a Class 2b catheter, designed specifically for supra pubic use.

If you are unfamiliar with this product we understand the company representative is more than happy to speak with you and or organise to send you samples for trial with your clients.

Contact details: Sayco: Phone 9553 2700 / 1800 333 456 Email: [enquiries@sayco.net.au](mailto:enquiries@sayco.net.au)

Please be aware:

- Clients who are new to supra pubic catheterisation need to try a supra plus catheter before being considered for an alternative supra pubic catheter product.
- If there is an alternative product request please be aware the prescriber must provide robust clinical justification
